

Rose True Bloom® True Passion

12 Reasons Why it could be the World's Best New Rose

- **Hybrid Tea Shrub** – New class of rose with the vigor & ease of growth of a shrub rose but with the large flowers of a Hybrid Tea!
- **Superior Disease Resistance** - resistant to black spot, powdery mildew, downy mildew and rust
- **Amazing Vibrant Color** – Large petal-packed, vibrant salmon-red color
- **Multiple Award Winner**
 - A.R.T.S. ® (American Rose Trials for Sustainability) [Master ROSE 2018](#). (The highest award A.R.T.S.® bestows)
 - Pauline Merrell Award, Best Hybrid Tea Rose 2016
 - Biltmore International Rose Trials 'Best Hybrid Tea' 2016
- **Star Performer** – Dean Bond (organic) Rose Garden, Scott Arboretum, PA where they grow roses without the use of **ANY** chemicals.
- **Own Roots** – Vigorous enough to grow superbly well on its own roots, means **NO** rootstock suckers
- **Healthy Foliage** – Very clean, glossy dark green leaves that hold up well through the seasons.
- **Repeat Flowering** – Flowers from early summer right through to the frosts of autumn
- **Easy Care** – No fussy pruning! In early spring, simply trim entire plant to 15 inches.
- **Low Maintenance** – No need to “dead head”. In 3 years of trialing, we’ve seen very few hips, which means that it keeps repeat flowering without dead-heading.
- **Excellent Cut Flower** – Plentiful, large flowers (of good substance), produced on strong, sturdy stems makes it a superb rose for cutting.
- **Bred with Chi** (internal energy) – Hybridized by one of the world's foremost rosarians Ping Lim. He says “I breed roses with Chi”!

Superior disease resistance, Large flowered, Easy care and Repeat flowering – that's why it is a rose for the 21st Century (it has everything except fragrance)!
